Management Section

Salary Range: \$4308-5235/\$4731-5753/\$5196-6316

Number of Vacancies: 1

Job Description: (includes typical duties)

This is an exciting job opportunity with the Franchise Tax Board working on the California Child Support Automation System Project. The successful candidate will work with a group of Technical Architects and Specialists to architect, design, build, and maintain a state of the art technology infrastructure.

Under the supervision of the Manager, Architecture and Systems Management Section (ASM), and the direction of an ASM Lead Technical Architect, the Configuration Management (CM) Lead is responsible for daily operations of the complex System Configuration Management (SCM) processes and overall ownership of SCM tools for the CCSAS project and system software work related to them. The CM Lead coordinates with the Release Manager and Development Leads to determine priorities and schedule new baselines, releases, builds and deployment of software and hardware to different environments.

Required Knowledge, Skills, and Abilities:

- Proficiency in one or more scripting languages such as Perl, Ant and UNIX shell scripts.
- Strong systems or application design and development experience in a medium to large environment.
- Produce high quality work products in an environment of continuous change. Be flexible to changes in direction and priorities.
- Possess strong interpersonal and organizational skills, and be able to manage concurrent assignments.
- Strong written and oral communication skills, including the ability to effectively communicate technical information to a non-technical audience.
- Be self-motivated, enthusiastic, responsible, and accountable.

Desirable Experience/Qualifications:

- Familiarity with one or more Configuration Management tools, such as Rational ClearCase and Rational ClearQuest.
- Experience with configuration management activities such as code builds, release management, and configuration audits.
- Familiarity with FTB's organization, operations, and programs, and in particular those of the CCSAS Project.
- Ability to effectively work independently and in a team environment.
- Experience working in a systems administration environment supporting large complex systems.
